

The new standard for flexible, robust and feature rich payment

Solutions Range

IngePay™ is Ingenico's feature rich multi-merchant payment application designed for all merchants in the general retail, QSR, restaurant, E-commerce, MOTO and service industries. IngePay supports all major credit cards, debit cards and provides support for private label, EBT and gift cards.

IngePay is the result of years of experience in the transaction acceptance and processing business. It is easy-to-use, feature rich, and above all, tested for reliability and optimal performance. It is a single application that runs on Ingenico's Elite and iSeries terminals, reducing the cost of sales, support and certification.

IngePay retail and restaurant application features

- Support for up to 9 merchant IDs per terminal
- Multi-host Certification provides for faster, easier selling
- UNICAPT 32 version offers dial, wireless and high-speed IP connectivity
- Supports credit, debit, EBT, private label gift card and other value added applications
- Extensive built-in reports improve management productivity
- Features Amex split dial and PIP processing (dial only)
- Auto settlement can be utilized to ensure daily settlement and best rates
- Quick Setup Menu permits modification to frequently used parameters without scrolling through the entire menu
- Check authorization and guarantee services are supported through Elite Check or iChecks applications
- Advanced parameter printing and diagnostics
- Documentation includes online help and quick reference guides

Secure Multi-application Capability

IngePlay was developed using UNICAPT, a proven development platform. This unique development platform is a true multi-application platform and is completely portable to other UNICAPT enabled terminals. Value-added applications can be loaded securely, without fear of overwriting to the certified payment application, thus reducing time to market and development/certification costs.

Multi-platform Application

IngePlay runs on Ingenico's complete range of Elite and i Series terminals, providing a consistent user interface that reduces training and help desk costs, as well as certification time.
