

New Application Release Bulletin

IngeCheck NCN/ECHO Application (SPKT)

i5100

Our Value Add team has recently released our newest addition to the suite of Value Add Applications. We are proud to announce that Ingenico has received a Class “A” certification letter from Global eTelecom Inc. on June 9, 2008 as well as a Class “B” certification letter from NCN/ECHO on June 3, 2008, allowing our iSeries terminals to transmit check authorization messages to both check hosts in one single application. This application has also received certification from RDM’s ITMS system for archiving images. Ingenico’s IngeCheck application is written in the SPKT format, which is commonly considered the NCN “old host”.

i7780

We expect to receive a Class “A” certification from NCN/ECHO in our next phase of development. Terminal Application Specification.
