

New Application Release Bulletin

MIDAX Electronic Payment Application

i5100

Ingenico's business development team has recently released our newest addition to the suite of applications. We are proud to announce that the MIDAX electronic payment application is now class "A" certified, making MIDAX the newest partner in our Value-Added Program.

The MIDAX electronic payment application is designed to process payments with custom magnetic stripe cards and paper checks. It is part of the PCI-DSS certified EFT system developed by MIDAX and implemented in many stores. The application is developed for the Ingenico i5100 terminal with an Ethernet communication interface.

The following card types with magnetic stripe are supported by the application:

- Gift cards
- Charge cards
- Fleet cards
- Electronic check cards (ECC)
- Loyalty cards

Terminal Types:

- i5100

Application Specifics:

- Application Version: 1.00
- Communications Supported: IP
