

New Application Release Bulletin

MoneyBar Gift & Loyalty Application

i5100

Ingenico's business development team has recently released our newest addition to the suite of Value-Added Applications. We are proud to announce the development of the MoneyBar Gift & Loyalty Card application specifically designed for small business and franchise organizations.

Ingenico POS terminals link to MoneyBar's proprietary Transaction Management System (TMS) to enable merchants to deploy a variety of configurable programs for gift & stored value, loyalty, fundraising and membership card strategies.

MoneyBar presently serves a wide range of small business and enterprise customers on three continents from its offices in Vancouver, BC and Salt Lake City, Utah.

This application is now officially Class "A" certified, making MoneyBar the newest partner in our Value-Added Program. The application supports either IP or Dial, depending on the card program capabilities selected by the merchant. Configuration parameters specify the communication type and dial backup capability.

Terminal Types:

- i5100

Application Specifics:

- Application Version: 1.06
- Communications Supported: Dial, IP
